

Sleeping Beauty

- The main screen of Sleeping Beauty displays the current date and time which is retrieved from the system.

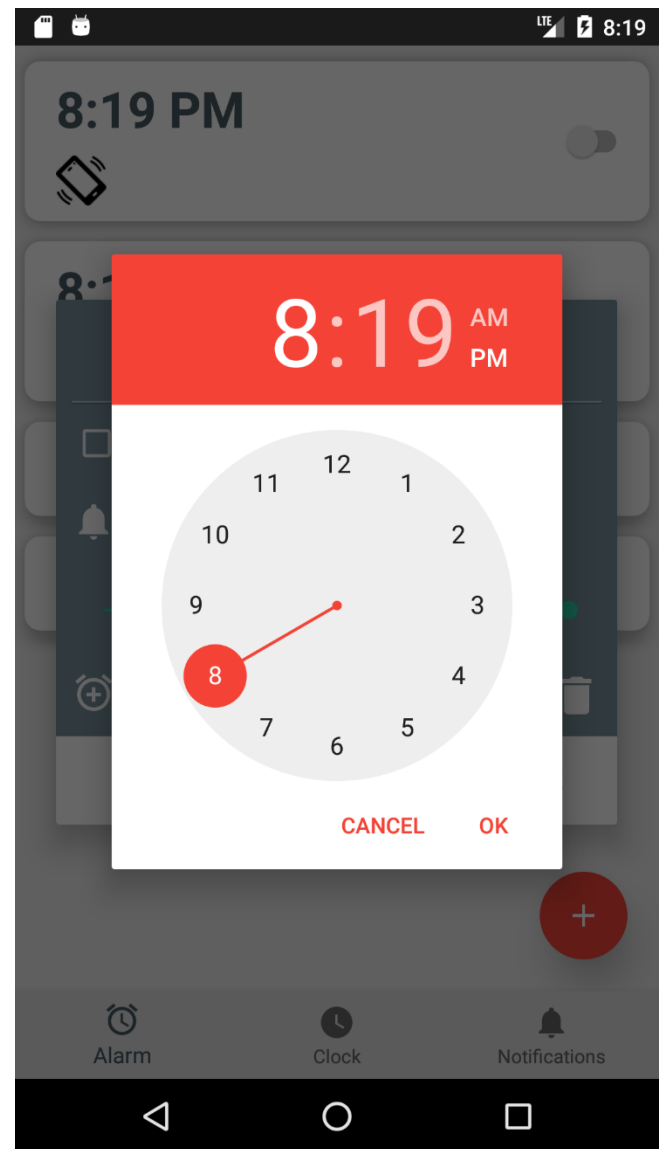

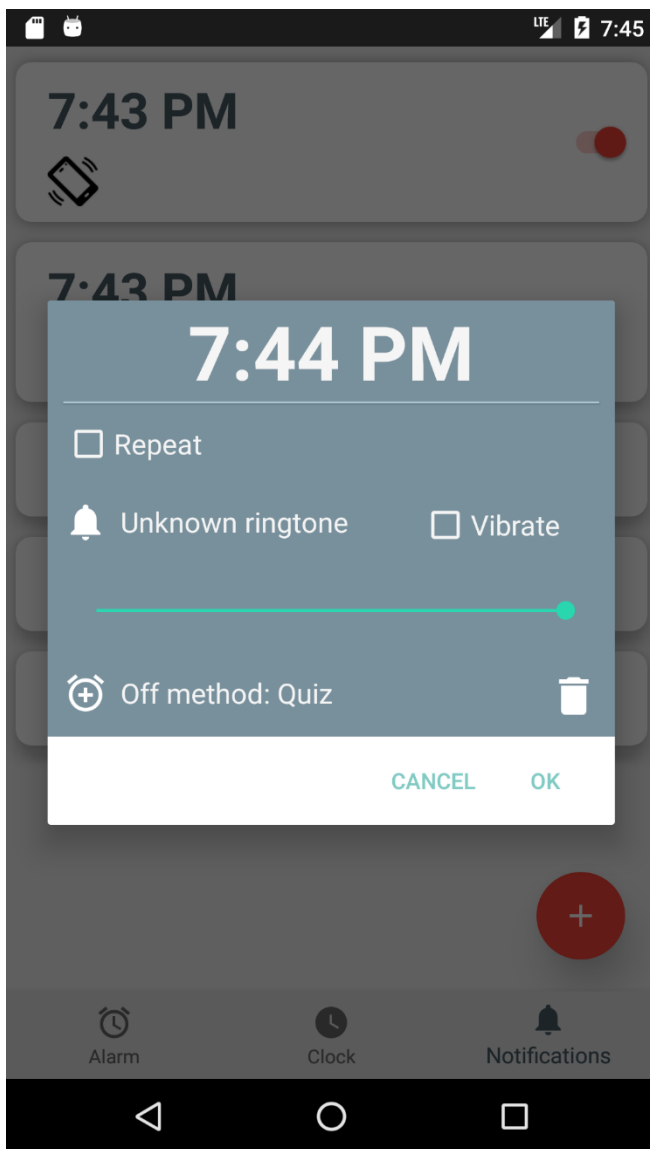

Users can turn on the switch controller to enable the current alarm .

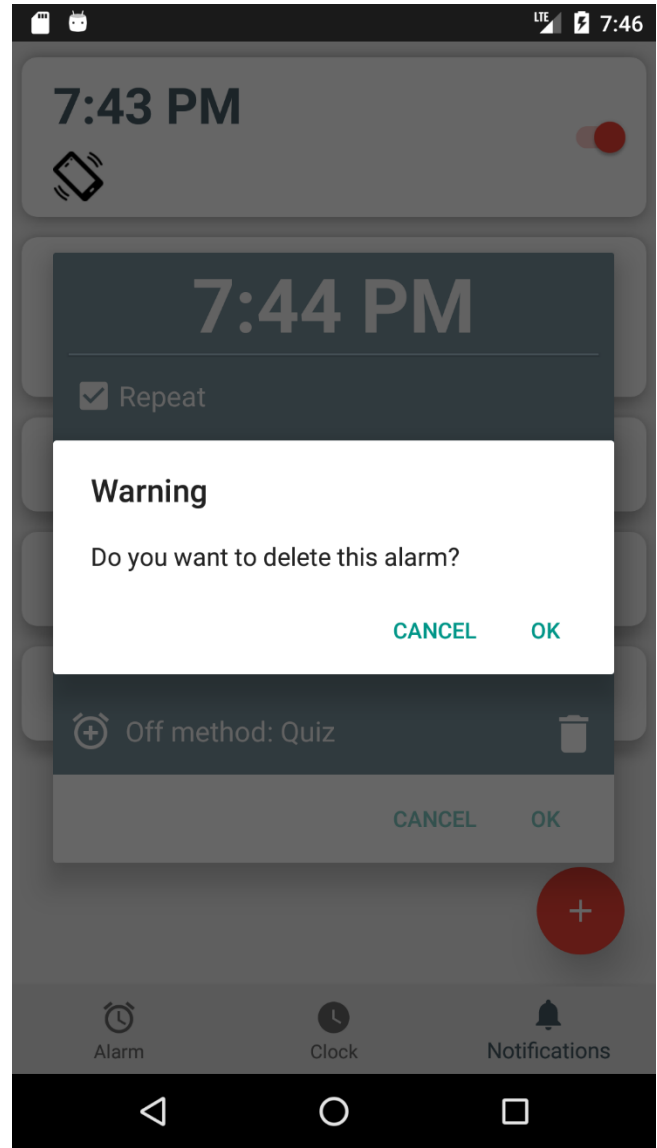

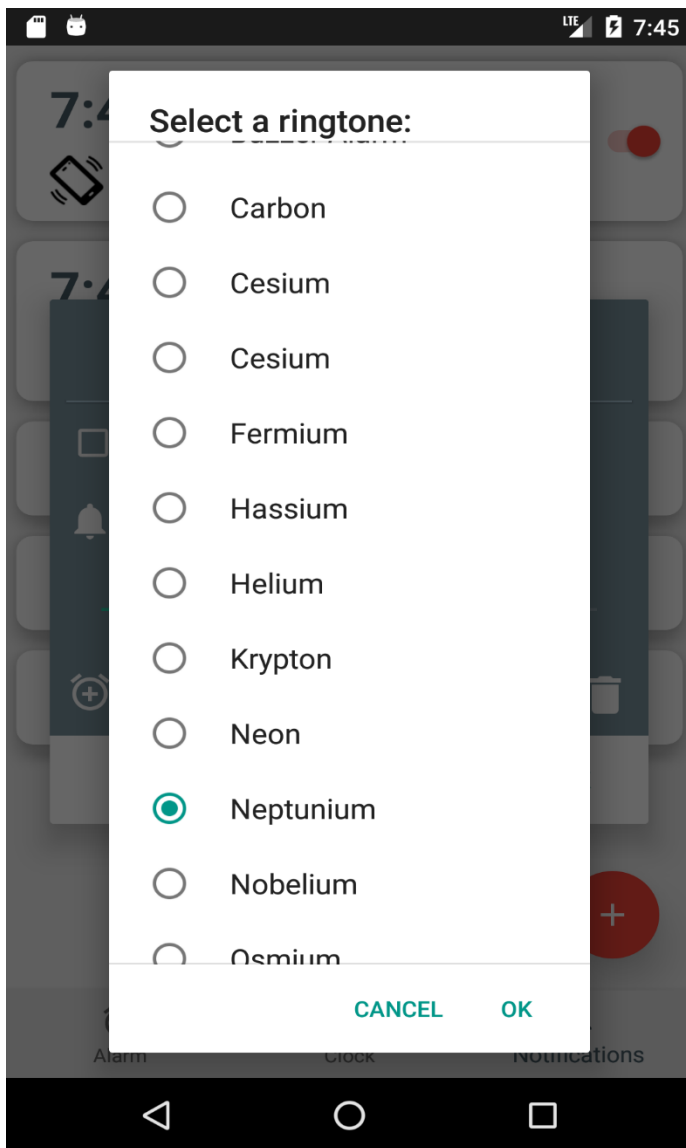

- A new alarm is created by choosing the red circle with plus sign.

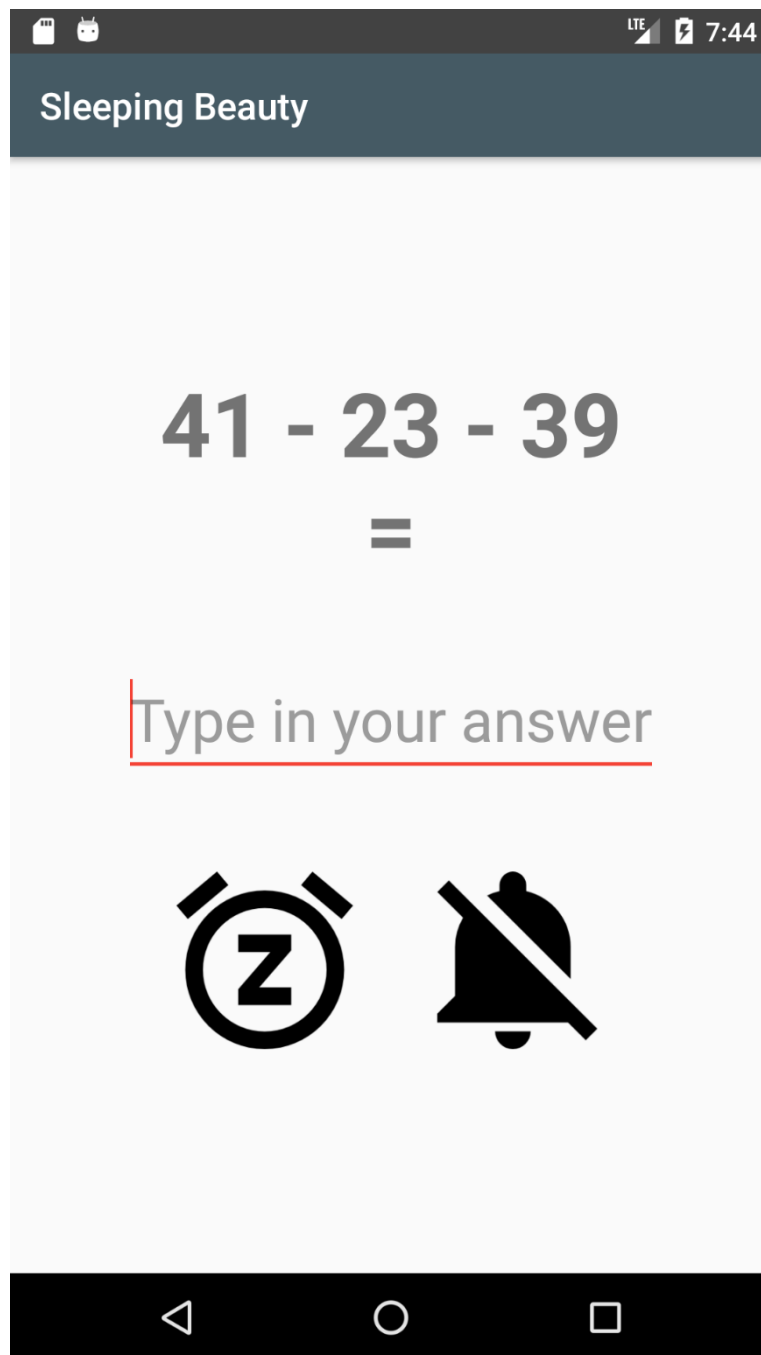

- *User shall choose one card (the alarm) in order to edit the alarm setup.*

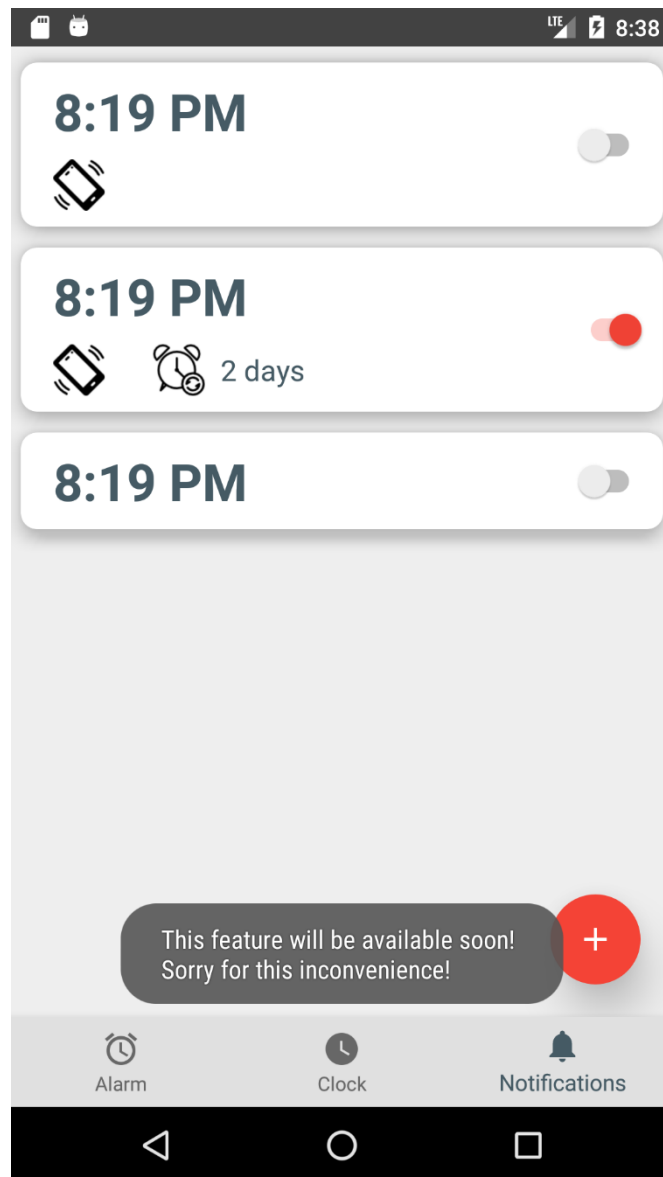

- The default method for an alarm off method is by solving quiz.
- And the default volume is set to maximum.

- There are several ring tones for users to choose and user can also choose their favorite song in the external storage.
- When users want to delete the current alarm, the waste bin icon is there to be served.

- In order to turn off the alarm ring tone, users must solve the math problem
- They can also choose snooze, so that they can sleep a few minute more.

- The notification tab is still in further development
